

OVERVIEW PROJECTS SUPPORTED		
Objective	Information about the applicant and/or the project concerned	Website of the applicant
1. Project-based support		
1.1	Research ref. the suitability co-products as component for pelleting in the circular agriculture	The main aim of this project is to develop innovations required to manufacture quality pelleted feeds that contribute to the realization of a circular agriculture with less starch from primary products and with more co-products being potentially fibrous in nature. Applicants: Wageningen University
1.2	SNV rumen 8	Rumen8 is a free software application that allows farmers and consultants to easily manage dairy and beef cattle diets to increase production and reduce costs. An emphasis on ease of use sets it apart from many other nutrition applications which makes it ideal for quickly creating or checking diets by farm managers, owners and visiting nutritionists. Applicant: SNV is a not-for-profit international development organisation that makes a lasting difference in the lives of people living in poverty by helping them raise incomes and access basic services.
1.3	APV extruder WUR loopt nog vanuit 2016	This concerns the upgrade of an existing APV extruder with the aim of ...
1.4	Aeres	Improvement of control system dosing weigher at Aeres Training Centre International (formerly PTC+)
1.5	SRUC	Home Office compliant placing digestive cages for the evaluation of nutritional values for poultry. Applicant: SRUC (Scotland's Rural College), a higher education, consulting and research institution focused on agriculture and life sciences.
1.6	IFF Salmonella II	Industry Research Project "Salmonella 2", Process for safe hygienisation of compound feed. Applicant: The IFF Research Institute is the scientific centre of the compound-feed industry and its suppliers. For more than 50 years, it has been supporting the entire industry through community and contract research results, a wide range of services and a comprehensive range of training and education events.
1.7	Setrem Extruder
1.8	Voederwaardetabel CVB	The core activity of CVB is to evaluate feedstuffs for farm animals and to establish energy and nutrient requirements for farm animals. The feeding values and nutrient requirements established by CVB may serve as a reference and benchmark by a number of user groups (such as feed producing companies, consultants, farmers, education and research institutes). Applicant: The activities related to the CVB program are carried out by Wageningen Livestock Research and the Flamish Research Institute for Agriculture, Fisheries and Food (ILVO).

1.9	International Feed Technology Congress	International Feed Technology Congress. The 1st IFTC was held during the 2019 VICTAM International exhibition. The Congress brought together some 100 researchers from universities, research institutions and industry. The congress exhibited thematic presentations by international key note speakers as well as oral and poster presentations. Themes of this technology congress were the valorization of raw materials by technology, the current process developments and issues dealing with the results of feed technology for feed formulation.	https://victamfoundation.com/
1.10	Asean Feed Summit and Feed & Rice Summit	As the first edition of the ASEAN Feed Summit proved to be successful in 2014, the summit took place again in 2016 during the FIAAP, VICTAM & GRAPAS Asia 2016 event. The summit was organized by Victam International BV, sponsored by the Victam Foundation and hosted by the Thai Feed Mill Manufacturers Association.	
		The Victam Foundation also sponsored the second ASEAN Feed & Rice Symposium which was also held during the FIAAP, VICTAM & GRAPAS Asia 2016 event.	
	2. Repeating support		
2.1	WPSA, jaarlijks	The World's Poultry Science Organisation is an organisation that strives that strives to advance knowledge and understanding of all aspects of poultry science and the poultry industry	http://www.wpsa.com/
2.2	FDL, jaarlijks	Feed Design Lab is a practical research and education centre for innovation and sustainability in the animal feed sector. The organisation embraces a test-plant, education facilities and staff for realising projects.	https://feeddesignlab.nl/en/
2.3	Young Feed Professionals jaarcongres 2017 (Nevedi), jaarlijks	Congress of The Young Feed Professionals (YFeedPro); they form a network of young professionals (< 40 years old) in the Feed and Pet food industry who together take on the challenge of sharing knowledge and network for an animal feed industry with a future perspective. Initiators of the congress are The Dutch Animal Feed Manufacturers (Nevedi), Belgian Feed Association (BFA), Feed Design Lab (FDL) and Fouding promotion of animal nutrition studies (BSD)	https://feeddesignlab.nl/yfeedpro/
2.4	Aebiom, jaarlijks (?)	The European Biomass Association is the common voice of the European bioenergy sector with the aim to develop the market for sustainable bioenergy, and ensure favorable business conditions for its members.	https://bioenergyeurope.org/
2.5	Nevedi, jaarlijks(?)	Nevedi (The Dutch Feed Industry Association) protects the interests of the Dutch feed industry. 113 Feed companies and suppliers are associated with Nevedi. The represent 96% of the total feed production for livestock in the Netherlands.	https://www.nevedi.nl/
2.6	Wageningen Universiteitsfonds	The Wageningen University Fund has since its inception in 1951 been organising and funding activities that reward and stimulate excellent education and research. This includes stimulating the academic development of students.	https://www.wur.nl/en/Benefactors/More-information-1/About-University-Fund-Wageningen.htm

2.7	IFF Research, Braunschweig, jaarlijks	IFF Research Institute is the scientific centre of the compound-feed industry and its suppliers. For more than 50 years, it has been supporting the entire industry through community and contract research results, a wide range of services and a comprehensive range of training and education events.	https://www.iff-braunschweig.de/
2.8	IFIF, jaarlijks(?)	The International Feed Industry Federation (IFIF) represents and promotes the global feed industry as an essential participant in the food chain that provides sustainable, safe, nutritious and affordable food for a growing world population.	https://ifif.org/
3. Scholarships			
3.1	WUR/ Victam Scholarship	Every year, the VICTAM Foundation selects up to 10 eligible students and will award four scholarships, two for MSc students in Animal Sciences and two for double degree students. Applicant: Wageningen University.	
4. Research Projects			
4.1	PhD onderzoek WUR breekgedrag grondstoffen	Breaking behaviour of diet ingredients, equivalent particle size and its relation with animal performance. This research into breaking behaviour of ingredients and the equivalent particle size is very innovative and of great value for the international animal feed industry. Applicant: Wageningen University.	
4.2	WUF Petfood Support Guido Bosch	This project aims to develop various in-house tests to assess the nutritional adequacy and quality of petfoods through a four-year research programme conducted by a PhD candidate. Applicant: Wageningen University.	
4.3	Keuzevak Feed Formulation Science	Setting up a course that provides students with a solid grounding in the aspects of feed formulation sciences. The course focuses on nutrients, feed ingredients, feed additives and diet formulation. Applicant: Wageningen University.	
4.4	Fungal Lignocellulosic Biomass	Practical implementation of fungi-treatment technology in Vietnam for rice straw lignin degradation. Applicant: Wageningen University.
